

SELF-MONITORED

When monitored by a carer, or family member, the K.I.T Personal Safety Device will call the nominated contact when an alert is triggered allowing that person to speak directly to the wearer.

How does it work?

The K.I.T Personal Safety Device will be programmed to call a nominated contact, as well as send an alert to up to five authorised family members or friends via SMS and/or email, providing them the last known GPS location of the device.

You may also call the device to speak to the wearer via the two-way audio function.

At any time as an approved carer, you can login to the K.I.T website or Android App using your user name and password. This will allow you to securely monitor the wearer's location or alter the settings to customise the device to the needs of the wearer.

24/7 MONITORED

Your K.I.T Personal Safety Device can also be monitored by a 24-hour monitoring centre .

How does it work?

Each device is supplied and installed with a pre-configured SIM card. The dedicated alert (SOS) button is programmed to contact the response centre, which will quickly assist via the hands-free phone feature of the device while viewing the wearers location.

The response monitoring centre can contact emergency services or the nominated responders to attend, depending on the wearer's needs.

LOCKING STRAP

The locking strap accessory can ensure that the watch is not removed by the wearer or someone else. A removal alert can be set up to notify up to five contacts via SMS and email.

FOR PEACE OF MIND MADE SIMPLE
**KEEP IN TOUCH WITH A
K.I.T CONNECTIVITY
SOLUTION.**

MOBILE PERSONAL EMERGENCY RESPONSE SYSTEM

K.I.T is a Mobile Personal Emergency Response System (mPERS) that works anywhere there is mobile phone coverage, allowing an emergency alert with current location information to be sent at the push of a button.

With two-way hands-free voice communication, onboard GPS, fall detector, SOS button and mobile connectivity, the K.I.T mobile device is an all in one solution that is perfect for active seniors or anyone that wants peace of mind in or out of home.

K.I.T keeps you in touch with the people that matter. With easy to use functions and simple setup, K.I.T uses its own SIM card, allowing it to connect to the mobile network without the need for a separate mobile phone. This ensures the device is the easiest solution to use, providing safety just about anywhere.

The K.I.T mobile device can be worn as a watch, as a pendant or attached to a carabiner. It is also a stand-alone mobile phone, so you can always stay in touch. The device can even be set to automatically answer calls should the wearer be unable to press the call button.

At any time, an approved carer or family member can login to the K.I.T website using a secure user name and password to keep connected to the wearer. The K.I.T mobile device can also be monitored by an external monitoring centre for 24/7 support and response.

Unlike home-based alarm systems that only work around the home, K.I.T provides independence for the wearer to go out and about where and when they want, while giving peace of mind for carers and loved ones that help is just a button press away.

MOBILE PHONE FUNCTION

K.I.T has its own SIM and works like a mobile phone. It can call two pre-programmed numbers, as well as the pre-set emergency or monitoring number. You can also call the device from any phone.

SOS ALERT

Press the black SOS button for two seconds and K.I.T will connect you via a two-way handsfree phone call to a pre-set SOS number or alert a 24/7 monitoring centre while sending its location via SMS and/or email to your emergency contacts.

GEO-FENCE

Geo-fences can be easily created to provide notifications when the wearer leaves a designated area or safe zone. These alerts can notify the authorised contacts. Area alerts can also be set to advise contacts when the wearer has arrived at a pre-set destination.

REMINDERS

K.I.T can be programmed using the Online Client Console to show reminders at set times. Reminders include: Medication; Drink; Food and Transport. K.I.T provides the wearer with the option to acknowledge that they have heard or seen the alert.

WEARABILITY

K.I.T is compact and lightweight (weighing just 51 grams) and can be discreetly worn as a watch, attached to a lanyard or on a carabiner.

FALL SENSOR/MAN DOWN

Should the wearer be prone to falling or have a potential to be in a 'man down' situation, the built-in Fall Sensor will automatically call nominated emergency number and alert authorised contacts via SMS and email.

ONLINE CLIENT CONSOLE

Our easy-to-use Online Client Console allows access to the K.I.T map screen together with the management of device features and functions via a web interface or the Android App.

24/7 MONITORING CENTRE

Your K.I.T Personal Safety Device can be monitored by a 24-hour monitoring centre for dedicated support and response.

NON MOVEMENT ALERT

This can be set to provide an alert after a pre-determined time if there is absolutely no movement detected from the device (excluding when on charge).

VIBRATION CONFIRMATION

With on-board vibration, the K.I.T Personal Safety Device can provide discrete confirmation that an SOS alarm has been sent or that a fall alert has been activated.

EASY CHARGING

The K.I.T device includes an easy-to-use, charger. The magnetised base design ensures the device connects the right way. There's no need to change the batteries or struggle with tiny phone plugs and power cords.

IP67 RATING

With IP67 rating K.I.T can be worn in the rain, in the shower or in the bath for up to half an hour to one meter depth.
